DETAILED ACTION

Allowable Subject Matter

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patent # 4,737,731, does not teach nor render obvious a power amplifying apparatus that has, in combination with other limitations, an arithmetic unit that detects a DC voltage component (Ec) from the power supply voltage Vc, and that multiplies the modulation sensitivity by a ratio (Vc/Ec) of the power supply voltage (Vc) to the DC component (Ec) or multiplies the input AC signal Vi by a ratio (Ec/Vc) of the DC component (Ec) to the power supply voltage (Vc); neither does it have a switch is driven by a pulse signal generated by modulating an input AC current signal at a modulation sensitivity multiplied by the ratio (Vc/Ec) of a power supply voltage Vc to a DC voltage component Ec of the supplied power supply voltage Vc; nor does it have switch is driven by a pulse signal which depends on an input AC signal multiplied by a ratio (Ec/Vc) of a DC voltage component Ec of a power supply voltage Vc to the supplied power supply voltage Vc to the supplied power supply voltage Vc.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
